## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "Display manager" (claims 1, 15); "the display manager is connected to the image buffers" (claim 16); the system comprising a decoder and a first and second processors (claims 1, 2 and 4) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 2-14, 18-23 and 25-28 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification fails to teach or describe the claimed “the first memory stores a first set of instructions” (claims 11, 21); “second memory stores a second set of instructions” (claim 14); “first memory stores a second set of instructions” (claim 22); “second memory stores a set of instructions” (claim 23); and “first memory stores a set of instructions” (claim 25).

Regarding claims 2-14, 18-23 and 25-28, the claims (for example, claim 4) additionally require a first and second processors and a first and second memories. It seems both the decoder and the first processor perform the same decoding functions, “decoded the encoded image and parameters associated with the images”. Similarly, the first processor also “performs the display engine functions (claim 5) for displaying the decoded images based on the decoded parameters” which is also duplicated the functions of display engine. It is unclear which one of the two units within the same system performs the decoding and/or displaying functions. Are these units same or

different? It is also not clear whether the first and second memories and the buffers are referred to the same or different storage devices.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. Claims 1, 15-17 and 24 are rejected under 35 U.S.C. 102(e) as being anticipated by Jiang et al (6,614,441 hereinafter "Jiang").

Jiang teaches a system (Fig. 1) for displaying images on a display (150) comprising a decoder (180) for decoding encoded images and parameters associated with the images; image buffers (160) for storing the decoded images; parameter buffers (registers 310-330) for storing the decoded parameters associated with the decoded images; a display engine (226) for receiving the decoded parameters and displaying the decoded images based on the decoded parameters; and a display manager (200) for

determining the display order of the decoded images. Therefore, at least claims 1, 15-17 and 24 are anticipated by Jiang.
